

Addition jusqu' à 10: Additionner trois nombres

1

Complète comme dans l'exemple.

$8 + 5 + 2 = \square$

Diagram showing the addition process: 8 and 2 are connected by a line to form 10, and 10 and 5 are connected by a line to form 15.

$10 + 5 = 15$

$1 + 9 + 7 = \square$

Diagram showing the addition process: 1 and 9 are connected by a line to form 10, and 10 and 7 are connected by a line to form 17.

$\dots + \dots = \dots$

$8 + 6 + 4 = \square$

Diagram showing the addition process: 8 and 2 are connected by a line to form 10, and 10 and 5 are connected by a line to form 15.

$\dots + \dots = \dots$

$2 + 4 + 8 = \square$

Diagram showing the addition process: 2 and 8 are connected by a line to form 10, and 10 and 4 are connected by a line to form 14.

$\dots + \dots = \dots$

$3 + 6 + 7 = \square$

Diagram showing the addition process: 3 and 7 are connected by a line to form 10, and 10 and 6 are connected by a line to form 16.

$10 + \dots = \dots$

$5 + 6 + 4 = \square$

Diagram showing the addition process: 5 and 5 are connected by a line to form 10, and 10 and 4 are connected by a line to form 14.

$10 + \dots = \dots$

$4 + 8 + 2 = \square$

Diagram showing the addition process: 4 and 6 are connected by a line to form 10, and 10 and 2 are connected by a line to form 12.

$10 + \dots = \dots$

$3 + 1 + 9 = \square$

Diagram showing the addition process: 3 and 6 are connected by a line to form 9, and 9 and 9 are connected by a line to form 18.

$10 + \dots = \dots$
