

Addition jusqu' à 10:
Additionner en utilisant les presque doubles

1

Dessine ce qui est demandé puis complète.

$3 + 2 = \square$

$3 + 4 = \square$

$4 + 5 = \square$

$6 + 7 = \square$

$7 + 8 = \square$

$8 + 9 = \square$

2

Complète comme dans l'exemple.

$7 + 6 \approx 6 + 6 \rightarrow 6 + 6 = 12$ alors $7 + 6 = 12 + 1 = 13$

$4 + 3 \approx 3 + 3 \rightarrow 3 + 3 = \square$ alors $4 + 3 = \square + 1 = \square$

$6 + 5 \approx 5 + 5 \rightarrow 5 + 5 = \square$ alors $6 + 5 = \square + 1 = \square$

$9 + 8 \approx 8 + 8 \rightarrow 8 + 8 = \square$ alors $9 + 8 = \square + 1 = \square$
